

# THE OCEAN IS MOVING IN: BUILDING RESILIENCE TO SEA LEVEL RISE

NOVEMBER 30, 2021 | 12:30-1:45 PM

[REGISTER VIA ZOOM](#)

Sea level rise threatens California's beloved beaches, wetlands, and tide pools, and more broadly, our coastal communities and state economy. Climate change is accelerating, which means now is the time to prepare, adapt, and mitigate this complex threat. But how do we adjust to sea level rise and what does that mean for our policies and investments? Join us for a science update from NASA's Jet Propulsion Laboratory, and to hear how California's Tribal, state and local governments are coming together to build resilience for our world-renowned coast.
